PROJECTS

Traveling Website: - git-repo: - https://github.com/ANKITs-Projects/Travelling-Website-Mini-Project

It is a simple **responsive** static website I was developed by using **HTML**, **CSS**.

In this Traveling Website there are three pages **Home**, **About** & **Contact**. In Home page there are several sections in those section there are some images and description. In About page there is a about section & in Contact page there is a contact section I use **Form** in the contact section. It is a simple static **responsive website** and to make it responsive I use **@mediaquery**.

E-Commerce Website: - git-repo: - https://github.com/ANKITs-Projects/Angular_e-Commerce

This e-commerce web application, built with **Angular**, offers a dynamic and user-friendly platform featuring login & sign-up functionality for both customers and sellers. It includes a dedicated seller section for managing products and inventory with seamless CRUD operations enabled by JSON Server. The **responsive UI**, designed with **Bootstrap**, ensures an intuitive experience across devices, while real-time updates and dynamic features such as filtering, sorting, and search enhance usability. This project demonstrates a modern approach to ecommerce development, combining robust front-end frameworks.
